Baking test—continued
Two methods in relation to protein content. R. H. Harris ... 557
Volume measuring apparatus for small loaves. J. G. Malloch and W. H. Cook ... 307
Bailey, Barbara A. and C. H. Bailey. Book review. Brotgetreide und Brot, by M. P. Neumann ... 419
Bailey, C. H.
A new type of fermentation cabinet ... 341
Book review. Bread, A Collection of Popular Papers on Wheat, Flour and Bread, by Harry Snyder ... 192
Calibration of loaf measuring devices with metal models ... 346
Chairman, Report of the Committee on the Standard Baking Test ... 348
Report of the Editor-in-Chief ... 409
and Barbara A. Bailey. Book review. Brotgetreide und Brot, by M. P. Neumann ... 419
and E. G. Bayfield. Water imbibition of frosted wheat ... 108
and W. E. Brownlee. Proteolysis in bread doughs ... 487
and L. P. Karacsonyi. Relation of the overgrinding of flour to dough fermentation ... 571
Bailey, L. H.
A simple apparatus for measuring the compressibility of baked products ... 340
Report on methods of incorporating ingredients and their effect on Standard Baking Test ... 368
Barackman, R. A. Report of Subcommittee on Methods of Scoring ... 365
Bayfield, E. G. and C. H. Bailey. Water imbibition of frosted wheat ... 108
Bin, effect of type upon storage of combined wheat. F. C. Fenton and C. O. Swanson ... 428
Blish, M. J.
The gluten and non-gluten proteins ... 421
and B. D. Hites. A rapid and simple carbide method for estimating moisture in flour ... 99
Book reviews
Bread. A Collection of Popular Papers on Wheat, Flour and Bread, by Harry Snyder; reviewed by C. H. Bailey ... 192
Brotgetreide und Brot, by M. P. Neumann; reviewed by Barbara A. Bailey and C. H. Bailey ... 419
"Cerco"—Proceedings of the First International Conference on Flour and Bread Manufacture, edited by Francis Hruska; reviewed by J. A. Dunn ... 193
Direct Reading Humidity Recorder, Bulletin No. 880 of Leeds & Northrup Co. ... 420
Microbiology of Starch and Sugars, by A. C. Thaysen and L. D. Galloway; reviewed by Millard F. Gunderson ... 595
Notes on Hydrogen Ion Measurements, Note Book 3, Leeds & Northrup Co. ... 526
Technologie der Herstellung, Teilung und Formung des Weizenteiges, by Hans Deutsch-Renner; reviewed by F. A. Collatz ... 98
Wheat, by W. W. Swanson and P. C. Armstrong; reviewed by D. M. Frederiksen ... 311
Bread
Apparatus for measuring volume of small loaves. J. G. Malloch and W. H. Cook ... 307
Calibration of volume measuring devices. C. H. Bailey ... 346
Measuring compressibility. L. H. Bailey ... 340
Method for testing for ropiness. H. H. Bunzell and Marion Forbes ... 465
Photographing. C. G. Harrel ... 313
Proteolysis in doughs. W. E. Brownlee and C. H. Bailey ... 487
Staling of. Washington Platt ... 1

Brooke, Mary M., Chairman. Report of the Committee on Methods of Testing Cake and Biscuit Flours 364
Brownlee, W. E. and C. H. Bailey. Proteolysis in bread doughs 487
Buffer value, water extracts of flour at different H-ion concentrations. G. E. Holm and Emily Grewe 49
Bunzell, H. H. and Marion Forbes. A method for testing for ropiness of bread 465
Cake flour
Report of Committee on Methods of Testing. Mary M. Brooke, Chairman 364
Study of non-gluten constituents. H. Hall 270
Cake scoring. R. A. Barackman 365
Carbon dioxide determination in baking powder by A. O. A. C. gasometric method. J. R. Chittick, F. L. Dunlap and G. D. Richards 473
Catalase, method for testing for ropiness in bread. H. H. Bunzell and Marion Forbes 465
Cereals and mineral metabolism. M. S. Fine 456
Child, Alice M. and Emily Grewe. The effect of acid potassium tartrate as an ingredient in angel cake 245
Chittick, J. R., F. L. Dunlap and G. D. Richards. The A. O. A. C. gasometric method for the determination of carbon dioxide in baking powder 473
Chocolate cake, effect of variation in ingredients in color. Emily Grewe 59
Collatz, F. A.
Book review. Technologie der Herstellung, Teilung und Formung des Weizenteiges, by Hans Deutsch-Renner 98
Chairman. Report of Committee on Flour Specifications 397
Colloid-chemistry of gluten. H. L. Bungenberg de Jong and W. J. Klaar 222, 587
Color
Of angel cake as influenced by acid potassium tartrate. Emily Grewe and Alice M. Child 245
Of chocolate cake, effect of variation in ingredients. Emily Grewe and Alice M. Child 59
Combine-harvester, quality of combined wheat. F. C. Fenton and C. O. Swanson 428
Compressibility, method for measuring baked prdoucts. L. H. Bailey 340
Cook, W. H. and J. G. Malloch
A volume measuring apparatus for small loaves 307
Yeast testing 133
Cream of tartar, as an ingredient of angel cake. Emily Grewe and Alice M. Child 245
Davis, C. F. Wheat protein test digestion studies 518
Dehydration of doughs with acetone. W. E. Brownlee and C. H. Bailey 487
Diastatic activity of experimentally and commercially milled flours. T. A. Pascoe, R. A. Gortner and R. C. Sherwood 195
Dough
Automatic proofing device for. T. R. Aitken 331
Fermentation and overgrinding of flour. L. P. Karacsonyi and C. H. Bailey 571
Proteolysis in. W. E. Brownlee and C. H. Bailey 487
Dunlap, F. L., J. R. Chittick and G. D. Richards. The A. O. A. C. gasometric method for the determination of carbon dioxide in baking powder 473
Dunn, J. A.
Book Review, "Cerco"—Proceedings of the First International Conference on Flour and Bread Manufacture, edited by Francis Hruska 193
Chairman. Report of Publicity Committee 405
Testing soft wheat flours for uses other than cake making 372

Page
Durham, R. K., Chairman. Report of the Auditing Committee 407
Durum wheat flour, properties of acetone extractions. A. W. Walde and C. E. Mangels 480
Editor-in-Chief, report of. C. H. Bailey 409
Employment Committee A. A. C. C., report of C. B. Morison, Chairman 404
Erratum, statistical study of collaborative protein determinations. Alan E. Treloar 97
Ether extract, estimation of fat in wheat products. C. W. Herd and A. J. Amos 251
Executive Committee A. A. C. C., report of 402
Fat, its estimation in wheaten products. C. W. Herd and A. J. Amos 251
Fenton, F. C. and C. O. Swanson. Studies on the qualities of combined wheats as affected by type of bin, moisture and temperature conditions. Part I 428
Fermentation
  And overgrinding of flour. L. P. Karacsonyi and C. H. Bailey 571
  Effect on the viscosity of flour-water suspensions. Arnold H. Johnson and Jesse Green 117
  Yeast testing. W. H. Cook and J. G. Malloch 133
Fermentation cabinet
  Automatic proofing device. T. R. Aitken 331
  New type of cabinet. C. H. Bailey 341
Fifield, C. C. and Ray Weaver. Hand molding vs. Machine molding 358
Fine, M. S. Cereals and mineral metabolism 456
Fisher, V. E. Effect of temperature on the dough and its influence on the Standard Baking Test 367
Flohil, J. T., Chairman. Report of the Committee on Methods of Analysis 380
Flour
  Buffer intensities of water extracts at different H-ion concentrations. G. E. Holm and Emily Grewe 49
  Comparisons between commercially and experimentally milled. T. A. Pascoe, R. A. Gortner and R. C. Sherwood 195
  Effect of weathering on protein and ash content. W. O. Whitcomb and Arnold H. Johnson 162
  Overgrinding and dough fermentation. L. P. Karacsonyi and C. H. Bailey 571
  Properties of acetone extracts. A. W. Walde and C. E. Mangels 480
  Rapid carbide method for estimating moisture. M. J. Blish and B. D. Hites 99
  Report of Committee on Specifications. F. A. Collatz, Chairman 397
  Standardizing the granulation test. J. Micka and K. Vrana 280
Forbes, Marion and H. H. Bunzell. A method for testing for ropiness of bread 465
Frederiksen, D. M. Book review, "Wheat," by W. W. Swanson and P. C. Armstrong 311
Frosted wheat, water imbibition of. C. H. Bailey and E. G. Bayfield 108
Geddes, W. F. and C. H. Goulden. A study of the utility of protein peptization by inorganic salt solutions as a means of predicting loaf volume 527
Gliadin, colloid chemistry of. H. L. Bungenberg de Jong and W. J. Klaar 222
Gluten
  Colloid chemistry of. H. L. Bungenberg de Jong and W. J. Klaar 222, 587
  Proteins. M. J. Blish 421
Gortner, R. A., T. A. Pascoe and R. C. Sherwood. Some comparisons between commercially and experimentally milled flours 195
Goulden, C. H. and W. F. Geddes. A study of protein peptization by inorganic salt solutions as a means of predicting loaf volume 527
Granulation
  Effect upon diastatic activity. T. A. Pascoe, R. A. Gortner and R. C. Sherwood 195
  Standardizing the test for flour. J. Micka and K. Vrana 280
